Images

As standard in a social network, tribute allows user to associate images with their profiles, posts and events. The following endpoints facilitate these operations.

Methods

Get image

Retrieves an image from the API.

```
GET /images/:type/:id
```

- Request:
  - Path parameters:
    - type: as in image type (volunteers/orgs/posts/events)
    - id: id of entity
- Response:
  - Success:
    - Status code: 200
    - Body example: image

Update volunteer image

Updates a volunteer's image. Requires authentication by said volunteer.

```
PUT /auth/images/volunteers/:volunteer_id
```

- Request:
  - Path parameters:
    - volunteer_ id: id of volunteer
  - Body :

```
{
    "data": "[contents of image encoded using base64]"
}
```

- Response:
  - Success:
    - Status code: 201
    - Content-Type: application/json
    - Body example:

```
{
    "status": "success",
    "body": {
        "message": "Image updated",
        "success": true
    }
}
```

Update org image

Updates an org's image. Requires authentication by said org.

```
PUT /auth/images/orgs/:org_id
```

- Request:
    - Path parameters:
        - org_id: id of org
    - Body :

```
{
    "data": "[contents of image encoded using base64]"
}
```

- Response:
    - Success:
        - Status code: 201
        - Content-Type: application/json
        - Body example:

```
{
    "status": "success",
    "body": {
        "message": "Image updated",
        "success": true
    }
}
```

Update post image

Updates a post's image. Requires authentication by post owner.

```
PUT /auth/images/posts/:post_id
```

- Request:
    - Path parameters:
        - post_id: id of post
    - Body :
```

```
{
    "data": "[contents of image encoded using base64]"
}
```

- Response:
  - Success:
    - Status code: 201
    - Content-Type: application/json
    - Body example:

```
{
    "status": "success",
    "body": {
        "message": "Image updated",
        "success": true
    }
}
```

Update event image

Updates an event's image. Requires authentication by event owner.

```
PUT /auth/images/events/:event_id
```

- Request:
  - Path parameters:
    - event_id: id of event
  - Body :

```
{
    "data": "[contents of image encoded using base64]"
}
```

- Response:
  - Success:
    - Status code: 201
    - Content-Type: application/json
    - Body example:

```
{
    "status": "success",
    "body": {
        "message": "Image updated",
        "success": true
    }
}
```
